- State & Local Tax
- Tax Controversy
- Tax Specialty Services

CRI understands the day-to-day operations of the agribusiness industry. In fact, some of us were once farmers. That's why we can discern the vast differences in processes between a peanut farm and a dairy farm. Our first-hand experience gives us more profound knowledge of the inner workings of the industry and allows us to consult a full spectrum of clients from small family-run farms to multimillion-dollar corporate operations that include cotton gins, peanut shellers, and seed wholesalers. Our agribusiness client services range from expansion planning to farm business valuations to business entity structuring. Additionally, we prepare, compile, review, and audit relevant financial information in accordance with standards established by the American Institute of Certified Public Accountants (AICPA) for our clients to use as a part of their loan package presented to lenders for their annual operating loans and other financing needs.

Our understanding of farming operations and their financing needs allows us to provide meaningful recommendations as we deliver custom-fit services for our clients that create continuous value now and into the future. Whether we are helping you streamline current workflows or implement new processes, CRI is focused on increasing your yield.
