The CRI team works with government contractors to interpret, implement, and comply with regulations while continually working to improve profit margins, minimize taxes, enhance indirect cost strategies, and help ensure compliance with governmental agencies. Specifically, our team provides auditing, consulting, training, and advisory services to government contractors to navigate compliance with the stringent requirements and policies set forth by the Federal Acquisition Regulations (FAR) and the Cost Accounting Standards Board (CASB), as well as changes to the programs of the Small Business Administration (SBA).

CRI's team of professionals understands the government's complex regulations and can help your organization achieve compliance. We are able to customize our services to the individual needs of your business. Some of our services include:

- Back office training and support,
- General ledger and project management system consulting,
- Timekeeping system set-up,
- Defense Contract Audit Agency (DCAA)/Defense Contract Management Agency (DCMA) audit support,
- Incurred cost electronically (ICE) model compliance,
- Cost allocation structure creation,
- Indirect rate development and forecasting,
- Labor rate development, and
- Proposal pricing support.
