

Quality patient care is the name of your game. Forward-thinking strategy and action-oriented insights are ours.

Why CRI?

In today's rapidly changing healthcare landscape, providing quality patient care while simultaneously striving to achieve a positive operating margin and be a good steward of public resources is more complex, highly regulated, and volatile than ever before. As a result, it is critical that hospitals and health systems partner with a CPA and advisory firm that actively specializes in healthcare and fully understands the unique challenges, risks, and opportunities acute care providers face.

CRI's Healthcare advisory team serves hundreds of hospitals and health systems across the South in various roles, from independent financial statement audits to cost reporting and value-added reimbursement engagements and nearly everything in between. We partner with and support numerous hospital associations and advocacy groups in an effort to contribute to the success of hospitals and health systems throughout our firm's expansive footprint.
